Dated-.....22/10/25.....

## Clarification notice

The following clarifications are hereby uploaded against the NIT No- 25/CIVIL/W/TVNL/RAN/2025-26

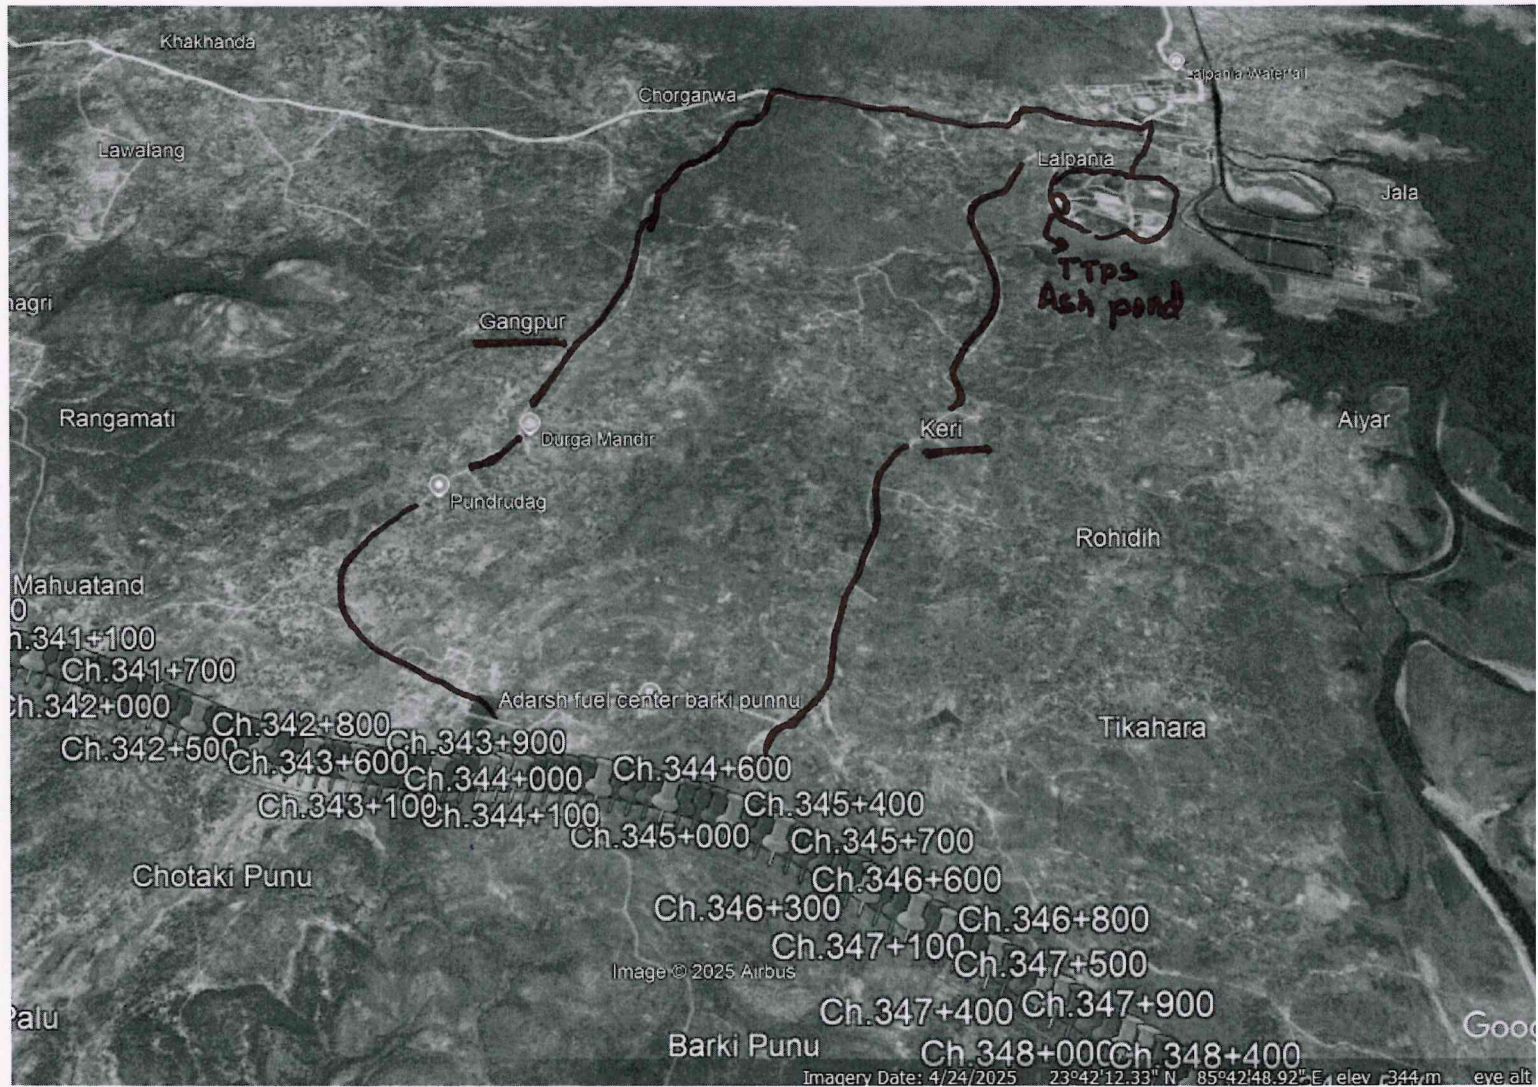

| Sl. No | Bidder Queries                                                                                                                   | Clarifications                                                                                                                                                                                                                                                    |
|--------|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.     | The official route map or alignment plant from TTPS ash pond to the designated NHAI disposal site under PKG-12                   | Two routes have been proposed from TTPS ash pond to NHAI disposal site.<br>i. TTPS ash pond to NHAI disposal site via village Khirabeda/Keri- <b>Lead 18 KM(Approx)</b><br>ii. TTPS ash pond to NHAI disposal site via village Gangpur- <b>Lead 24 KM(Approx)</b> |
| 2.     | The exact lead distance measured along the approved route for transportation.                                                    | Exact lead can't be determined now. Ash disposal site may vary as per NHAI requirement.                                                                                                                                                                           |
| 3.     | The GPS co-ordinates or identifiable reference points of both loading and unloading locations.                                   | Road Map sketched from Google earth attached reference.                                                                                                                                                                                                           |
| 4.     | Confirmation whether the route involves public roads, private roads or restricted access stretches.                              | Public/Village Road                                                                                                                                                                                                                                               |
| 5.     | Any alternate or contingency routes likely to be used in case of blockages or ongoing NHAI works.                                | Already mentioned in sl. No-1 above.                                                                                                                                                                                                                              |
| 6.     | Clarification on sprinkling of water: Whether sprinkling is to be done by the contractor right from loading to unloading points. | Sprinkling to be done by the contractor in the proposed route in conformity to the specification of Pollution control norms from loading to unloading points as and when required.                                                                                |
| 7.     | Capacity of vehicle Dumpars/Hywa/Tippers can engaged in the said tender                                                          | The contractor may engage any Dumpars/Hywa/Tippers as per road condition and suitability of transportation work.                                                                                                                                                  |
| 8.     | Actual transportation route to be followed to unloading the material.                                                            | Replied in Sl. No-1                                                                                                                                                                                                                                               |

**Note:** The bidder is entirely responsible for carrying out the loading and transportation of ash from TTPS ash pond to the ash disposal site identified by the NHAI including any route change, diversion etc. in proposed routes mentioned in sl.no-1 above. The quoted rate shall include all cost involved in ash transportation work from loading point to unloading point apart from the scope of work mentioned in the tender document for smooth transportation of ash. The bidders are requested to visit the site/proposed route before quoting their rate against the above e-Tender.
